4Play

4Play DMX Buffer

The Chroma-Q™ 4Play™ is a fault tolerant, self healing four way DMX buffer designed to fully isolate all outputs from each other. Supplied with four 5 pin connectors, each output is separately generated and boosted from the original DMX signal. The 4Play is suitable for truss mounting with a normal hook clamp and will work with mains voltages worldwide. It also features a chassis mounted IEC male to assist international cabling.
