

Technical Bulletin No. 49

16 May 2017

Overview

During heavy use, it is possible that the Space Force primary lens diffusion film can be scratched, modifying optical performance, which could result in additional maintenance cost. As a result, a cost effective, *optional* protective lens is now available, which is installed on top of the primary lens and will help prevent scratches to the diffusion film.

PRIORITY	LOW - discretionary
Description	Protective Lens Accessory
Product Name	Space Force
AC Part(s)	<i>For use with:</i> CHSPFV & CHSPFVLR
Model(s)	650-1000 & 650-1500
Serial Number(s)	ALL
Cause(s)	Scratches can occur to the diffusion film on the primary lens as a result of heavy use.
Solution	A clear, protective lens is now available.

INSTRUCTIONS

Purchase the lens kit and follow the QSG instructions included with the kit.
