Installation Procedure

For the 2inspire™ IP 20 fixtures, insert the diffusion filter first, it might need to be slightly bent to insert.

Next, insert the C ring to lock the diffusion filter in place.

Figure 1 – IP20

To install or change a diffusion filter on the IP 65 version, the front bezel must be removed and the diffusion gel inserted between the glass and the lens. Only the Chroma-Q original diffusion gel are approved to be used.

The four screws on bezel need to be reinstalled with a torque of 1.45 Nm (12.83 in-lb) for 2inspire™ 100 and 1.6 Nm (14 in-lb) for 2inspire™ 200/300 to ensure complete tightness preventing any environmental exposure of the fixtures.

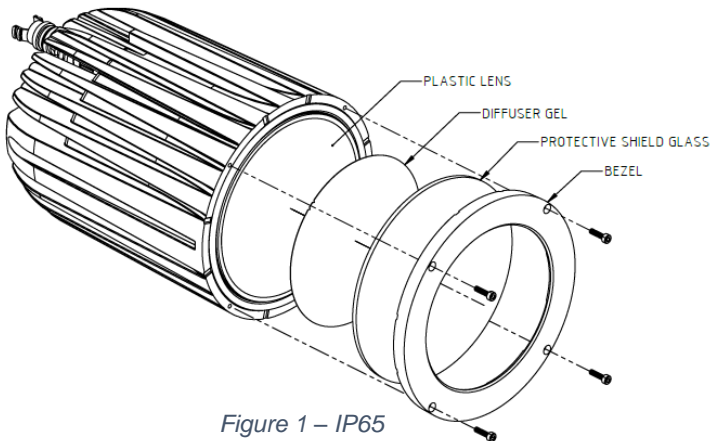

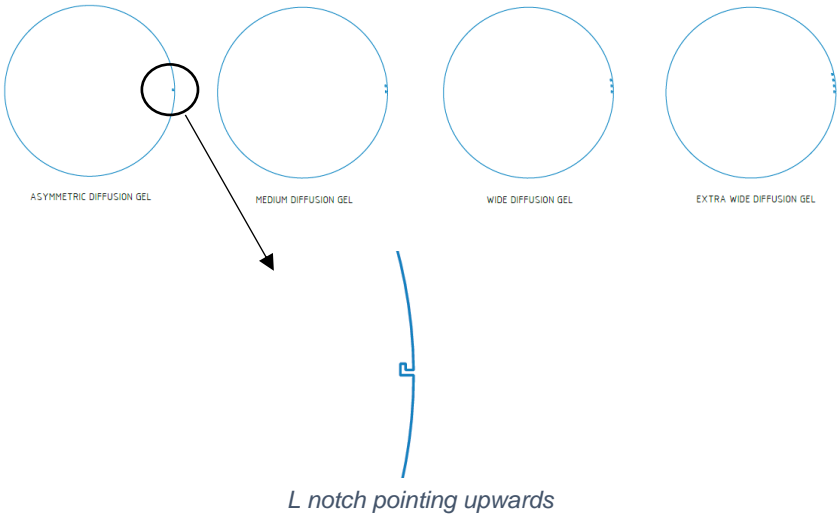

Figure 1 – IP65

Patterns and Orientation for diffusers

The shiny surface should be facing down towards the Lens of the fixture
